WORK EXPERIENCE

Senior Project Engineer | Frontend Developer

Wipro Limited

01/2023 - Present

Tech Stack - HTML, CSS, JavaScript, React, Redux, AWS, Jenkins

- Developed **responsive** web pages using HTML, CSS, and JavaScript, resulting in around a **15% boost** in mobile user engagement.
- Identified and resolved a CSS bug causing inconsistent alignment of elements across different browsers, resulting in a more visually polished and consistent user interface.
- Successfully handled state management using **Redux**, improving application performance and reducing load time **by 20%**.
- Collaborated within an Agile development team, participating in daily stand-ups, planning, and code reviews, ensuring smooth project execution and timely delivery.

Project Engineer (Turbo)

Wipro Limited

06/2021 - 12/2022

Tech Stack - Java, Jboss Server, Stash, AWS, SoapUI, Postman etc

- Automated the task of daily HealthCheck of applications which reduces my everyday's efforts by **2 hours**.
- Successfully delivered a critical change for the Payment Page of an application which helps in reducing the mismatch of payment amount **by almost 100%**.
- Used **AWS EC2 instance**, **Load Balancing**, and **Auto Scaling** for deploying the servers and re-building them every month with the latest AMI.
- **Achievement:** Delivered high performance and secured a 5/5 rating in annual appraisal.

PERSONAL PROJECTS

YouTube-Lite - Video Streaming Application [🔗](#)

- Implemented a clone of the popular video streaming platform - *YouTube* using **RapidAPI**. Users can navigate to various categories of videos and search for any particular video and play a video.
- Build a **responsive design** that users can access from all types of devices.
- [Code](#) [🔗](#)

CodeBox - Code Editor [🔗](#)

- Developed a code editor inspired by *CodePen*, where you can write and preview HTML, CSS, and JavaScript code in real-time.
- Built using React and utilizes **CodeMirror** as the editor component.
- Provides a live preview functionality allowing users to instantly see the output of your code as you type.
- [Code](#) [🔗](#)

Pizza Delivery Application [🔗](#)

- Designed a simple pizza delivery application where users can start ordering one or more pizzas just by entering name.
- User can mark their order as a "priority" for an additional 20% of the cart price.
- Captured **GPS location** of the user can be taken to make delivery easier.
- [Code](#) [🔗](#)

Personal Portfolio [🔗](#)

- Created my personal portfolio responsive application using valid HTML5, CSS3 and JavaScript ES6.
- It contains all the sections like Home, About, Skills, Qualifications, Projects, Contact Me, and Footer.
- [Code](#) [🔗](#)
